prot. ET09_013

Sacile, January 12th, 2009

Dear Mr. Ognibeni,

Our Company has been a customer for CIRESA srl since 1981, when Paolo Fazioli founded it in Sacile, 60 Km from Venice, Italy.

Evenness, lightness and flexible strength were the features that, since the beginning, the Fazioli team wanted for the soundboard: these characteristics were actually founded in your soundboards, that are made of the same red spruce that Antonio Stradivari used for his violins.

We are delighted to say that we keep on being fully satisfied with the results we get by setting on our pianos the CIRESA soundboards.

Our grand and concert pianos are sold worldwide and we never experience troubles in the different countries and climates, from US to Asia-Pacific, from Europe to Russia...

The quality of the top selection of wood you use make an excellent component for our pianos and we are looking forward to continuing our good and long-lasting cooperation.

With all the best wishes

Paolo Fazioli
