

Ciresa

SOUNDBOARDS

of ITALY

recommends the
Piano Life Saver

“The Ciresa soundboards, installed in the most famous pianos, are considered the best in the world for their quality and for their acoustic properties. The Ciresa Co. confirms that the Dampp-Chaser Piano Life Saver System contributes to the maintenance of the ideal moisture conditions of the piano. The achievement of the wood stability avoids damages, warpings and cracks of the soundboard, which is the weakest component (few millimetres thickness) of the wooden frame of the instrument.”
