

C. BECHSTEIN

Signor
Fabio Ognibeni
CIRESA Srl – Tesero (Italy)

Berlin / Seifhennersdorf, 6.1.09

Dear Mr. Ognibeni,

I am very pleased with the results we have with the sound boards and ribs which we have from your Company. The results are very good for more than 10 years now, we therefore use your ribs 100% on all the pianos we make, and if we can get more of the thicker sound boards, we will be able to use your sound boards on all the pianos and brands which we make.

We sell these pianos in the entire world, in all types of climates and have no problems, which is the most important point for us and of the people who buy them. The climates of USA and Russia, not to mention some Asian countries present quite a challenge for solid sound boards, but fortunately, your sound boards are of excellent material, we are therefore able to cure and work them in such a way which is a great satisfaction.

We look forward to continuing our good cooperation with you for the sounds boards as well as the ribs.

All best wishes,

C.BECHSTEIN Pianofortefabrik AG
